## Success Stories

- **Federal Monitoring and Oversight of Long-Term Care Facilities**— Ascellon evaluates long-term care facilities' quality of care and the environmental safety, collects data electronically and maintains electronic databases for CMS. Project results translate into improved patient care.
- **Psychiatric Hospital Analytical Support**—Ascellon conducts surveys of hundreds of psychiatric facilities nationally. Ascellon replicates CMS's data reporting and retrieval systems OSCAR and ASPEN and statistically evaluates data from surveys with the clinical expertise to draw meaningful conclusions and make recommendation to CMS.
- **Risk Data Adjustment Data Validation**— Ascellon conducts independent medical record reviews to evaluate the accuracy of diagnosis data. Ascellon's abstraction system captures all data elements that include ICD-9 codes, patient data and Provider information. The ultimate goal is to improve accountability and use of federal healthcare dollars.
- **Performance Reporting and Administrative Support for Medicaid Grant Initiatives**— Ascellon Grant Specialists provide performance monitoring and grant oversight to state programs focusing on community and home-based care for the elderly and disabled.
