about

Ascellon Corporation provides high quality solutions to Federal government and other public organizations in the areas of survey design and development, data analysis, software development and maintenance, and program management. Over the last thirteen years, we have worked with our customers to satisfy mission-critical requirements by being innovative, responsive and adaptable. We use independently validated SEI/CMM Level 2 software processes, and we are ISO 9001:2008 registered. Ascellon employs over 50 full-time professionals. Our core competencies include:

- Healthcare Quality Management
- Program and Grants Management
- Survey and Statistical Analysis
- Internet and Web Solutions
- Software Engineering
- Networking and Operations

capabilities

Healthcare Quality Management

Ascellon has expertise in helping government and commercial organizations meet quality of care guidelines and regulatory requirements for residential and outpatient facilities. We provide interdisciplinary clinical, technical and analytical professionals who assist customers in meeting their healthcare quality goals.

Program and Grants Management

Ascellon has a high level of proficiency in Grants Management. We support government agencies by monitoring and managing over 200 healthcare grants in 50 states, 2 territories and the District of Columbia. Ascellon also assists Federal and State Operations in the provision of Technical Assistance regarding quality assurance and improvement strategies and interventions.

Survey and Statistical Analysis

Ascellon specializes in conducting national customer satisfaction surveys, observation surveys, and other data collection activities. We develop effective data collection strategies, perform detail analysis of data collected and assist in formulating action plans for performance improvements.

Internet and Web Solutions

Ascellon has assisted many customers, including Federal, state, and local government agencies and commercial clients, to implement Web applications for a variety of functions. These range from global inventory and requisitioning systems to management of city public works projects.

Software Engineering

We use independently validated CMM software processes. Ascellon leverages SEI/CMM to provide superior full life cycle software development services. Our customers benefit from Ascellon's ability to provide accurate estimates and superior software results for every project.

Networking and Operations

Ascellon supports and installs Local Area Networks (LANs) for a variety of clients covering a wide range of operating environments, including Microsoft, Cisco, Sun, Checkpoint, Citrix, and other popular technologies. We provide services in the areas of network design, support, and service, and help desk management.
